

SATHKRITH GAUR

ABOUT ME

Unreal Engine Developer with hands-on experience developing gameplay systems, player mechanics, and animation features using Unreal Engine 5 and Blueprint scripting. Currently working as a Game Developer Intern, contributing to gameplay systems and player animation implementation while expanding expertise in Unreal Engine C++ and game programming principles. Passionate about creating engaging gameplay experiences and continuously improving technical skills in game development.

SKILLS

- Unreal Engine 5
- Blueprint Scripting
- Gameplay Systems Development
- Animation Blueprints
- State Machines & Montages
- Enemy AI & NavMesh
- Combat Systems
- UI Development (UMG)
- Unreal Engine C++
- Git & GitHub
- Visual Studio 2022
- Blender

LANGUAGE

- English
- Hindi
- Telugu

EXPERIENCE

- Game Developer** (Jan 2025 – Jan 2026)
Backstage Pass Institute of Gaming, Madhapur, Hyderabad
 - Created and integrated enemy creature animations, handling full animation workflows including idle, movement, chase, and reaction states.
 - Imported, organized, and synchronized multiple combat and movement animations, ensuring smooth blending and correct timing across states.
 - Used Animation Blueprints, state machines, and montages to align sword combat animations with gameplay logic and player input.
 - Built multiple game prototypes focusing on gameplay mechanics, UI, and interactive environments.
 - Implemented core gameplay features such as player movement, interactions, and basic game logic using Blueprint scripting.
 - Created and integrated combat animations, including sword slash attack animations, connected to gameplay using Animation Blueprints / montages.
 - Developed understanding of game development workflow, debugging, and problem-solving during prototyping.
 - Interested in creating gameplay systems for horror and survival games.

EDUCATION

- Back stage pass institute of gaming** 2025 – 2026
Advanced diploma in game development
Trained in Unreal Engine 5, Blueprints, and C++ fundamentals with hands-on game prototyping. Built gameplay mechanics, UI elements, and interactive environments.
- CMS degree college** 2021 – 2025
Bachelor of Computer applications
Completed Bachelor of Commerce with knowledge of computer applications, business management, and accounting fundamentals. Developed strong discipline, communication, and analytical skills.
